

SKETCHING THE BORDERLINE | 23rd September | 11am Waverley Station

You are welcome to experience the new railway, from a place making perspective, with stops along the way through Midlothian and the Scottish Borders to see the plans for exciting new places and communities taking shape. 2016 celebrates the Year of Innovation, Architecture and Design in Scotland. Plus, the timing to hold this event, in September, is special because it marks the 1st Anniversary since the line was opened by Her Majesty the Queen in 2015. Come and meet some of the people who helped make it all happen. The day will end with a display of your drawings and a glass of wine to toast your success. Thereafter, you can depart under your own steam (4:30pm) using your free return ticket from Galashiels to Edinburgh (approx. 50 mins).

Richard T Rees | MA, Dip Arch, RIBA, FSAI

Richard is an architect/urban designer and artist/illustrator. He was co-creator of the masterplan for Liverpool One when an Urban Design Director at BDP. He now freelances as an urban designer and illustrator and is the chairman (and Fellow) of the Society of Architectural Illustration (FSAI). Richard now organises regular seminars on perspective drawing at Universities around the country teaching the principles of architectural illustration. Last year he had a very successful one man West End show of pastel painting entitled "Patterns of Settlement" of general views of cities.

Practical information

- **Drawing** | You do not need to be able to draw. It's a chance to try something different and learn about new places. The day will start with a quick tutorial from Richard and he will also be on hand throughout the day. Your observations, along the journey, will help us to continue developing places.
- **Refreshments** | A packed lunch, filled with tasty local produce from the Scottish Borders, will be provided. A drinks reception will conclude the day.
- **Weather** | Bring warm and waterproof clothing. You will not be doing any hill walking but comfortable foot wear is recommended.
- **Stops** | We will disembark at some of the towns. There will not, however, be detailed lectures about all of the towns along the route but info. will be sent, in advance, for those who wish to know more.
- **Luggage** | You will be able to leave cases at 'left luggage' in Waverley Station.

Come bring your sense of Academician adventure, to Scotland, and experience one of its largest engineering infrastructure projects, as well as the creation of new places from Edinburgh to the home of Sir Walter Scott.
